

W.M. KECK: A PORTAL TO THE UNIVERSE

HARCOURT C. "ACE" VERNON MEMORIAL LECTURE

Wednesday, September 26, 2018 • 7:30PM • Clayton Hall Conference Center

Our understanding of the universe has been expanding rapidly in the past two decades, fueled by new observing capabilities in space and on the ground. Join **Hilton Lewis, director of the W.M. Keck Observatory**, as he demonstrates how that facility's twin telescopes—among the largest on Earth—are helping scientists explore the universe with unprecedented power and precision. Learn how these “giant eyes” near the summit of Hawaii’s Mauna Kea are unveiling new knowledge of some of the most fundamental and mysterious aspects of the cosmos.
